

Bolt Modernizes MySQL with TiDB to Scale 1000s of Microservices on AWS

[Read Now](#)

Hi there,

With 100 million users across 500 cities, Bolt needs a database that can scale in the blink of an eye. But as the company grew exponentially after the pandemic, MySQL was too slow and fragile to keep up.

Here's how TiDB optimized Bolt's storage, availability, and resiliency to unlock global scalability.
